THET.

DATA ANALYST

JOIN OUR TEAM!

About the Tropical Health and Education Trust (THET)

THET is a global health charity working in partnership with governments, health institutions, and international bodies to train health workers and strengthen health systems across 31 countries.

We do this through grants management and capacity building, alongside research, convening and advocacy towards the goal of Universal Health Coverage. At the centre of our approach, is the model of Health Partnerships, long-term relationships between UK and LMIC health institutions, which improve health services through the reciprocal exchange of skills, knowledge, and experience.

At the heart of our work is vision of a world where everyone has access to healthcare.

OUR VALUES

1

Partnering through collaboration

2

Partnering with respect

3

Partnering with integrity

4

Partnering through learning

JOB SPECIFICATION

Hours	37.5 hours per week
Reports to	Head of Research, Evidence and Learning
Location	UK based - Remote
Salary	£36,516
Length of Contract	Permanent

JOB PURPOSE

You will work alongside the Head of Research, Evidence and Learning to help improve the collection, management and analysis of data from THET's programmes and external engagement.

THET is experiencing an exciting time of growth, and you will play a critical role in improving learning within the organisation, ensuring that the impact of the work we do is accurately captured and analysed, helping us sustain and improve crucial Health System Strengthening and Health Workforce Strengthening initiatives across the globe.

You will play a leading role in the operation and improvement of our data capture and analysis tools, including our Salesforce-based programmes MEL portal. You will contribute to the development of a data strategy for the organisation, and associated process improvement. You will help to ensure the quality of data, and contribute to research, programmatic learning, advocacy and more.

To be successful in this role, you will be a fast learner, get things done and excel in working across teams as well as managing a varied portfolio of work. You will be a strategic thinker with an ability to manage complex problems in situations with significant uncertainty.

KEY RESPONSIBILITIES

Data Management and Analysis:

- a. Review and oversee data management processes, including storage and retrieval of data.
- b. Support the quality assurance of data across platforms, including data cleaning and audit, and providing input to the improvement of data collection.
- c. Lead on the development of data analysis reports as required, for programmes,

Research or advocacy.

- d. Contribute to the analytical design of research initiatives and knowledge products.
- e. Lead on the oversight and analysis of strategic data points over time. Create and

Maintain dynamic data visualisations.

2. Organisational Improvement
 - a. Contribute to the development of a data strategy aligned with THET's wider I

Learning agenda.

- b. Identify issues and lead on the improvement of data related processes. Develop tools/guidance and engage in staff capacity building.

Programmes MEL Portal (Salesforce based)

- a. Ensure best practices are embedded across the use of the portal for quality, relevant data capture.
- b. Lead on the capacity development of staff and partners on use of the portal for data collection and extraction.
- c. Ensure the portal is fit for purpose, including interacting with service providers on troubleshooting and improvement.
