

Kidney Care UK

**Ensuring no one faces
kidney disease alone**

About kidney disease

Around **7 million people** in the UK live with chronic kidney disease (CKD), and **1 million of them don't know that they do**.

Over 68,000 are treated for end-stage kidney failure, **relying on dialysis or a transplant to keep them alive**.

Treatments are gruelling and relentless and impact patients' ability to work, maintain social interaction and live the lives they choose.

Kidney Care UK

For over 45 years, Kidney Care UK has been at the forefront of supporting people with kidney disease. From our early days when we campaigned to introduce donor cards in the UK, we have worked hard to **support and represent the interests of everyone affected by kidney disease**.

What we do:

- Our mission is to **improve the quality of life for everyone affected by kidney disease**.
- We provide **practical, emotional and financial support** to kidney patients and their families.
- We **campaign at a national and governmental level** to improve kidney health and care services.
- We **fund patient-centred projects** to help improve kidney care services throughout the UK.
