

Natural Capital Assessment Partnership Manager

Recruitment information

Warwickshire
Wildlife Trust

About us...

Warwickshire Wildlife Trust (WWT) is one of the 46 UK Wildlife Trusts. Established in 1970 we are a grass roots organisation governed by 16 trustees elected from a membership of over 30,000 people, 99% of whom live in the county, and supported by 800 active volunteers. We manage an estate covering 1,000 hectares in Warwickshire, Coventry and Solihull and no one living or working in that area is more than 6 miles from one of our 67 nature reserves.

As members of the influential network of Wildlife Trusts, we are part of a collective covering the whole of the UK with nearly 1million members, 35,000 volunteers, 2,500 staff and 600 trustees, all working together through a central unit, the Royal Society of Wildlife Trusts (TWT). Together we are on a mission to restore a third of the UK's land and seas for nature by 2030. We believe everyone, everywhere, should have access to nature and the joy and health benefits it brings. Each Wildlife Trust is an independent charity formed by people getting together to make a positive difference for wildlife, climate and future generations. Together we care for 2,300 diverse and beautiful nature reserves and work with others to manage their land for nature, too.

Warwickshire Wildlife Trust has a bold goal that, by 2030, nature will be in recovery with abundant and diverse wildlife everywhere, and that natural processes will be creating wilder landscapes where people and nature thrive.

Fundamental to that approach is our ambition to make more space for nature. In order to achieve that we must influence policy, work in partnership with other people and continue to deliver a range of impactful projects through collaboration that help bring our wildlife back and enable others to take action for nature on their land.

You will help fulfil our vision of a wilder Warwickshire

By 2030 we want to have put wildlife into recovery by creating more space for nature with more people on nature's side.

The **Natural Capital Assessment Partnership (NCAP)** team play a crucial in helping to deliver that vision. The Natural Capital Assessment Partnership has been running for over 20 years. Formally called the Habitat Biodiversity Audit, the NCAP has recently broadened out its remit and the name has evolved to become more representative of the future work. It involves detailed data gathering of natural capital data from across Warwickshire, Coventry and Solihull. It combines in field ecological survey with pioneering satellite imagery and remote sensing data analysis. This data then underpins Local Wildlife Site surveying and other work such as Local Nature Recovery Strategies, ancient woodland inventory, biodiversity net gain, carbon sequestration and green infrastructure mapping.

With over 25 years of data that forms complete coverage across Warwickshire, Coventry and Solihull, the NCAP is genuinely world-leading in its approach. To find out more about the project visit

<https://www.warwickshirewildlifetrust.org.uk/HBA>

<https://maps.warwickshire.gov.uk/greeninfrastructure/>

As part of a small but busy team, you'll be expected to:

- Lead the partnership – liaising with local authorities and statutory agencies
- Manage the team – ensuring effective prioritisation and delivery of work
- Analyse and interpret the data gathered using GIS
- Oversee project delivery including budgets and reporting to funders.

Steve Cheshire

Warwickshire Wildlife Trust is an ambitious organisation

We seek to learn from experience and embraces new ideas. We are driven by our shared passion for nature, and support each other to be the best we can.

We strive to communicate and collaborate well, representing the Trust in a friendly, professional, and well-informed manner.

We are a digitally-enabled organisation and embrace digital technologies and innovations to support, streamline and increase the Trust's activity & impact.

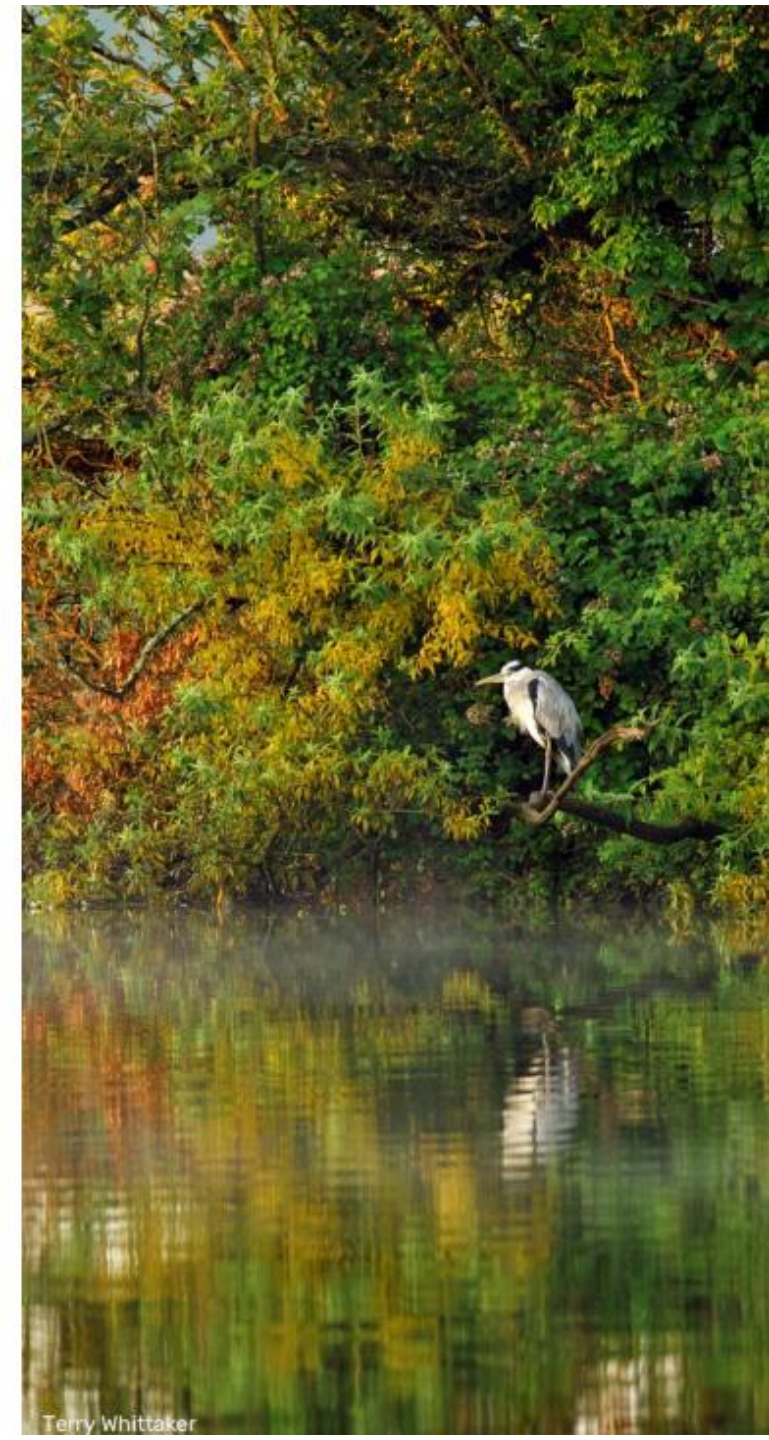

Specific skills, experience and attributes

Our ideal candidate will have some experience of project management and an understanding of GIS, and be ready for the next step up in your career.

You should already have a solid understanding of Windows desktop operating systems and Microsoft 365 – but your brilliant communication skills with colleagues and partners will be just as important.

To succeed in this permanent, full time role, you'll also need to be:

- Enthusiastic and keen, with a curious mind
- A great communicator and a real team player
- Someone with great attention to detail
- Driven and always seeking to improve.

Terry Whittaker
