

UPSHOT ENABLES ORGANISATIONS TO MANAGE, MONITOR & EVIDENCE THEIR IMPACT

What is Upshot?

Using a MEL (Monitoring, Evaluation and Learning) approach, Upshot Systems CIC helps organisations who make a difference become more insight-led. We provide an easy-to-use online tool - Upshot - to help funders and deliverers monitor, evaluate and learn from their data in one system, at any time, on any device, anywhere.

The Upshot online system enables you to:

- Easily collect and manage project data
- Monitor progress in real time
- Measure and evidence your impact effectively
- Learn from data to improve your delivery

The system is currently translated into: Dutch, French, Spanish, Portuguese & Welsh.

Registers

Take registers at sessions

Participants

Collect participant data and follow their journey

Survey

Conduct surveys

Reporting

Report on all your data in real time

Indicators

Track progress against performance indicators

Media

Store photos and videos

Mobile

Collect information on a smartphone or tablet

Map

Map locations and participants

Who is it for?

1,400+ organisations across many sectors and countries are using Upshot

The organisations we work with include funders, foundations, governing bodies, public sector organisations, NGOs and charities in any shape or form. Whether you are taking your first steps into digital data, working across spreadsheets and systems or wanting to offer a consistent way for grantees to provide evidence for your funded programmes, being part of the Upshot community can help.

We also provide MEL Services that sit alongside the system: workshops to enable your teams, help with reporting, frameworks and data-visualisation to help showcase your impact.

Local Government
Higher & Further Education **Criminal Justice**
Youth Work Wildlife and Conservation
Sport for Development
Health and Wellbeing Corporate Social Responsibility
Art and Music **National Governing Bodies**
Community Groups
Employment Services and more!

What is the set up process?

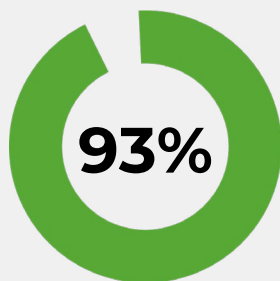

Our simple 5-step onboarding process
